

Help Us Grow

Association of Bahamas Marinas

Welcome to our marina and the beautiful Bahamas. We want to do everything possible to enhance your stay with us. Please ask if there's anything we can do for you.

Our marina is a member of *the Association of Bahamas Marinas (ABM)* that contributes to the welfare and viability of the yachting, boating and sports fishing industries.

Our goal is to preserve and grow these industries so you can enjoy cruising The Bahama Islands well into the future. Sustaining these industries and our natural marine resources requires hard work, dedication and funding.

The ABM is asking each of our member marinas to help this great cause with a 2% levy on dockage. This levy will go towards the initiatives and projects that the ABM promotes.

To find out more about the association, our initiatives and projects, please turnover.

What We Do

Association of Bahamas Marinas

The Association of Bahamas Marinas is at the forefront in advocacy on many important issues.

MAKING CRUISING SAFE

The ABM works with government and law enforcement to make Bahamas navigation and cruising safer. We aim to help fund, repair and maintain the vital harbours, channels and Aids-To-Navigation (ATONs) around the Bahamas.

BOAT SECURITY

The ABM interfaces with law enforcement, the rescue services and the private sector to maximize the safety of our visitors, their vessels and their property. For missing boat reports, see: <https://www.facebook.com/groups/Boat.theft.information/>

MODERNIZATION

Our association is at the forefront in encouraging government to make the clearing of customs, the registration of vessels and the payment of fees easy, affordable and a pleasant experience.

PROMOTING OUR INDUSTRIES

The ABM also works closely with the Ministry of Tourism to promote the marinas, yachting and sportfishing industries. Our aim is to provide useful information to boaters visiting The Bahamas.

SUSTAINABILITY

ABM members keenly participate in the sustainability of our industries and the conservation of our natural resources.
